

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Previously Presented) Apparatus for establishing communications between a calling station and one or more called stations based on information stored at a called station, at least one called station comprising:

- a. a memory storing information in a database;
- b. a receiver for receiving a communications request including a query specifying at least one criterion for searching said database;
- c. a comparator for comparing information stored in said database with said at least one criterion, and
- d. a transmitter for responding to said communications request only when said information stored in said database satisfies said at least one criterion.

2. (Original) The apparatus of claim 1, further comprising a global positioning satellite receiver for storing current location information in said database.

3. (Previously Presented) The apparatus of claim 2, in which said communications request includes at least one criterion based on location of said called station with respect to calling station.
